MODEL

centered text

$$\max_{c_t, k_{t+1}} \sum_{t=1}^{\infty} \beta^t u(c_t)$$
$$s.t. \ c_t + k_{t+1} \leq f(k_t) + (1 - \delta)k_t$$

Everyone does infinite horizon optimisation, right?

ESTIMATION FRAMEWORK

$$\text{outcome}_{ict} = \alpha_i + \sum_{k=0}^{2} \beta_{t-k}^{p} PPI_{ict-k} + \gamma_{ct} + \epsilon_{ict}$$

$$\text{outcome}_{ict} = \alpha_i + \sum_{k=0}^{2} \beta_{t-k}^{p} PPI_{ict-k} + \sum_{k=0}^{2} + \beta_{t-k}^{m} CPI_{ict-k} +$$

$$\gamma_c \times trend_t + \epsilon_{ict}$$

APPENDIX LAND

Now you can make it clear you've done a shitload of work
  without having to show everything! ▸ Back

You label a frame with the [label=name] option, and then point a link to it

You can make an object a link using the \hyperlink{label}{object} command
